Thanks for the update Kathy. It appears that the GAC filters are effectively removing GenX at low concentrations.

Good Morning,

Shown below are the final HFPO-DA results for 8 of the 10 residential GAC systems. We are still waiting for the result for the last two sets of samples that were collected. In addition, we do not have any of the PFOA data yet. These HFPO-DA result will be sent to the residents when the final PFOA results are available, but I wanted to make you all aware of them now. Thank you.

Kathy

Good Afternoon,

Inserted below is a spreadsheet documenting approval for GenX (HFPO dimer acid) sampling at the 10 private drinking water systems and two of the public water suppliers. "AP" is Ali Pearce. LHWA has requested additional information and we are in the process of drafting a response.

Subject: GenX Sampling Request for Private and Public Water Supplies Identified by EPA Region 3

Good Morning,

Attached please find PDFs of the letters sent by Fedex today to the 10 private residences and the three public water suppliers that were identified by EPA Region 3 for GenX sampling in their letter received by Chemours on January 11, 2018. The letters are scheduled for delivery on Monday, February 5, 2018. Region 3 also requested GenX sampling of the Washington Works GAC treatment system. This sampling is being scheduled to coincide with the February 2018 PFOA sampling. Thank you.
